

Dear colleagues,

Following the announcement of new routes from Spanish bases we have decided to update our routes categorization in order for you to have clear what kind of sector you are flying. Please note that not all routes are operated by Spanish bases but we have included them just in case by any reason, such as rescue flights, we end up operating them.

We are as well updating our payslip calculator for you to have control over your expected income and for it to be easier to detect possible discrepancies.
